

Job Title: .NET Web Developer

Location: Hiawatha, IA

Job Number: 0711-06

Channel Fusion is an integrated channel marketing services company and is a part of the Omnicom Group, a publicly traded company and a global leader in advertising and marketing communications. We are a provider of below the line marketing services that help companies and their independent retail partners/distributors better work together in co-marketing their products/services - we call it channel fusion. Our vision is to provide companies with exclusive or semi-exclusive distribution networks with a complete package of all channel marketing solutions under one roof to increase efficiency and effectiveness while decreasing costs. We want to be a valued extension of our client's marketing department by simplifying the channel marketing process and increasing its efficiency and effectiveness.

We are looking for a self motivated web developer with excellent knowledge of Microsoft's .NET development environment. Responsibilities include:

- Design and build ASP.net web tools. Use MS framework 1.1, 2.0, and 3.5 to develop multilingual applications in an n-tiered environment, ie presentation layer using ASP.net, Business Logic layer compiled into dynamic libraries and objects in VB.NET and a data access layer to connect to SQL server.
- Write stored procedures for use in the web tool and utilize an n-tiered objected oriented development approach. Write complex select, update, and control stored procedures in SQL Server 2000. To insert/update data per complex business logic requirements.
- Design and implement back-end database. Create database schema to manage client/business rules. Include scripts for table design, foreign key constraints, indexes, check constraints, etc.
- Work with clients to secure software development requirements and write documentation for the tool. Follow traditional software development life cycle development model, ie. analysis, planning, design, implementation, and testing.
- Develop and perform unit testing on the tool and work with Quality Assurance group through the Quality Assurance testing cycle. Includes unit testing individual pieces of code written before they are integrated into overall application.
- Provide technical support to client regarding web tool. Includes providing recommendations on application architecture, debugging any known issues as well as providing situations for any hardware/software related components.
- Participate in client communications: emails, conference calls, etc.

Knowledge, Skills, and Abilities:

- Bachelor's Degree in Computer Science or equivalent preferred.
- 2+ years of experience in object oriented web development using VB.NET and ASP.NET.
- Demonstrated knowledge of: Microsoft .NET environment, Windows NT/2000/2003 Operating Systems; web site localization; Microsoft SQL Server, RDMS including analysis, schema design, writing and integrating stored procedures and triggers, object-oriented programming paradigms.

- Experience with Crystal Reports, Java, XML, Exchange, UML design methodologies, and writing design documentation.
- Experience providing technical support, designing, and implementing back-end database systems and front-end interface and design; maintaining reports.

To apply for this position, please send your resume, cover letter, and salary requirements to Jobs@Channel-Fusion.com.
